

# SpyCatcher™ 5.1

## Features & Benefits

### Product Name

SpyCatcher™ 5.1

### Overview

SpyCatcher continuously protects computers from emerging, evasive spyware easily and safely while preserving PC performance. It provides users with a wealth of information on applications running on their PC so they can make an informed decision about which ones to allow and which ones to block and remove.

### What's New in SpyCatcher™ 5.0 & 5.1

**Enhanced Real-Time Proactive Protection** — SpyCatcher's Profiling Engine™ keeps your computer safe between scans. Its continuous protection monitors your PC for any suspicious behaviors that are typical of spyware. SpyCatcher proactively stops any action from taking effect before your PC is put at risk.

**Enhanced DeepDefense™** — This technology prevents the installation of rootkits, keyloggers, and other malicious programs safely. It intercepts all API calls, which blocks the installation of aggressive spyware. DeepDefense is embedded in the operating system and delivers the best protection from sophisticated new threats.

**ClearView Application Control** — A detailed list and description of applications currently running on your PC is provided. You can decide block and remove any applications based on this information.

**Vendor Tracking**— SpyCatcher provides you with a list of certified vendors that have digitally signed applications running on your PC. You can allow, or block and remove all software that was published by a particular vendor.

**Installation Tracking** — SpyCatcher provides you with a wealth of information on potentially unwanted applications that are attempting to install on your computer. You can allow, or block and remove applications more thoroughly so that no traces remain which could potentially harm your system.

**Automatic, High-Performance Scans** — SpyCatcher includes Quick, Deep, and Custom spyware scan options, which can be performed at regular intervals automatically or on-demand, according to a user's preferences. Optional low CPU scans can be used so it will not interfere with the performance of other PC programs.

**User-Friendly** — SpyCatcher has a new intuitive user-friendly interface. Beginner PC users can remove the most dangerous spyware easily. Experienced PC users can customize preferences and use the advanced application tools to suit their specific requirements.

**No-Risk Spyware Removal** —Files and programs that were previously blocked can easily be recovered. This allows you to remove files with confidence and without the threat of accidentally deleting legitimate files.

### Support for Windows Vista

# SpyCatcher™ 5.1

## Features & Benefits

Powerful Protection & Innovative Technology	
Feature	Benefit
<p><b>Risk Analysis Profiling Engine</b> – Provides proactive protection with multi-layers of spyware detection technology. It includes advanced behavioral analysis, which constantly monitors the PC and reports any suspicious activity to the user.</p>	<ul style="list-style-type: none"> <li>• Protects users from complex spyware threats</li> <li>• Stops any action from taking effect proactively before your PC is put at risk.</li> <li>• Enables the fastest and most comprehensive scanning</li> </ul>
<p><b>DeepDefense™</b> – Prevents the installation of rootkits, keyloggers, and other malicious programs safely. It intercepts all API calls, which blocks the installation of aggressive spyware. DeepDefense is embedded in the operating system and delivers the best protection from sophisticated new threats.</p>	<ul style="list-style-type: none"> <li>• Prevents spyware from harming a computer</li> <li>• Improves system performance</li> <li>• Stops recontamination of a machine</li> </ul>
<p><b>ClearView Application Control</b> – Provides a detailed list and description of the applications running on your PC. Users can decide to block and remove any applications based on this information.</p>	<ul style="list-style-type: none"> <li>• Gives users insight into what applications are running on their systems so that they can make informed decisions about which ones to trust</li> <li>• Provides an additional method for identifying spyware</li> </ul>
<p><b>Vendor Tracking</b> – Gives users a list of certified vendors that have applications running on their PCs. Many legitimate software vendors will digitally sign their software so malware vendors can't forge their identity. A user can allow, or block and remove all software that was published by a particular vendor.</p>	<ul style="list-style-type: none"> <li>• Maximizes spyware detection accuracy</li> <li>• Facilitates application management by allowing all software to be installed from a trusted vendor, or denying the installation of all software from an unknown and potentially harmful vendor</li> </ul>
<p><b>Installation Tracking</b> – If application files or behaviors are flagged as suspicious, SpyCatcher provides a wealth of information on that application and all its related files.</p>	<ul style="list-style-type: none"> <li>• Provides comprehensive information to users on applications so it is easier to make a decision on whether it should be allowed or blocked</li> <li>• Blocks and deletes unwanted applications more thoroughly so that no traces remain which could potentially harm your system</li> </ul>

# SpyCatcher™ 5.1 Features & Benefits

Ease-of-Use, Control and Performance	
Feature	Benefit
<p><b>User-Friendly</b> – Enables even novice PC users to remove and block the most complex spyware automatically. It includes a completely revamped, user-friendly interface.</p>	<ul style="list-style-type: none"> <li>• Allows consumers of all technical abilities to use the most aggressive, state-of-the-art spyware removal tool</li> <li>• Takes the complexity and danger out of removing spyware</li> <li>• Provides proactive, immediate protection</li> <li>• Improves load times</li> </ul>
<p><b>Automatic, High-Performance Scans</b> – Scans for spyware automatically, according to a user's preferences.</p>	<ul style="list-style-type: none"> <li>• Enables users to set it and forget it</li> <li>• Ensures up-to-date protection</li> </ul>

Safest Removal	
Feature	Benefit
<p><b>Safe Spyware Removal</b> – Removes the most tenacious spyware and recovers profoundly infected computers.</p>	<ul style="list-style-type: none"> <li>• Takes the complexity and danger out of removing spyware</li> <li>• Prevents system loss and the disposal of salvageable PCs</li> </ul>
<p><b>No-Risk Quarantine</b> – Enables users to recover all blocked files and programs that were previously "blocked" from running.</p>	<ul style="list-style-type: none"> <li>• Allows consumers to remove files with confidence and without the threat of accidentally deleting legitimate files</li> </ul>
